

Documenting Chichester's Historically Significant Buildings

Before demolition of a historic building begins, the Heritage Commission and the Historical Society respectfully requests that the owner voluntarily work with them to photographically document the standing structure or building and complete the front page of the Individual Inventory Form from the NH Division of Historical Resources. The applicant is encouraged to salvage significant architectural features if possible. After documentation is completed, the applicant would proceed with the demolition permit application process.

CRITERIA:

- structure is 100 years old or older
- structure has historic significance
- structure has architectural significance such as style or details worth noting (trim, porches, windows, fireplaces, staircases).

The building inspector, will determine if the structure meets the above criteria. He will then notify the Heritage Commission and the applicant to work out a plan to photograph the structure and complete the Individual Inventory Form. Those will be filed with the building inspector and a copy will be placed in a House History File at the Chichester Historical Society.

Thank you for taking part in the documentation of old significant structures which are part of our town's heritage.
